1. Overview

iBB is an internet based cash management system that provides balance and transaction information and single and bulk payment services. Linking with your Accounts Payable or ERP System, the Multicurrency (MCY) Bulk Payment Upload facility allows you to upload via iBB, in a single file, payment instructions and remittance data going to beneficiaries in the SEPA zone (including Ireland) and worldwide.

The purpose of this document is to describe the MCY XML file format requirements, the layout of the file and the validation that will be performed.

1.1 Payment Types

The table below details the types of payment that are supported in the file:

Product	SCT or Non-SCT	Definition	Debit Posting
SEPA Credit Transfers (SCT) from a EURO branch account	SCT	All non-urgent euro payments debiting an AIB Branch Account, going to a SEPA reachable bank in Ireland and the SEPA Zone * Recipient IBAN is mandatory.	A single debit will be posted to the Branch Account for all payments within the same payment block in a file regardless of how many individual payments are contained in the block. The two lines of debit narrative on the nominated account will be: Line 1 – First 18 characters of the reference populated by you in the Customer Reference field at the time of file upload. Note: If you are submitting your file via SFTP or Connect Direct, the first 18 characters of the value populated in the Message Id field of the Group Header will appear as the first line narrative. Line 2 – PFXXXXXXXXXXXXXXXXXX where PF stands for Payment File and XXXXXXXXXXXXXXXXXXXX is the unique file reference generated by AIB when the file is uploaded.
SEPA Credit Transfers (SCT) from a EURO (NSC930067) currency account	SCT	All non-urgent euro payments debiting a euro-denominated AIB Currency Account, going to a SEPA reachable bank in Ireland and the SEPA Zone*.	These payments will be debited individually from your account and the two lines of the debit narrative on the nominated account will be: Line 1 - IEXXXXXXXXXXXXXXXXXX Line 2 - First 16 characters of the 'End to End Id' reference provided by you.
GBP Payments going to the UK debiting a 238590 account	Non-SCT	Payments in GBP (Sterling) debiting an account with Sort Code 238590, going to a recipient bank in the UK. The recipient bank must be connected to the UK FPS and/or CHAPS clearing systems.	Debit entries for each payment are posted individually to the respective 238590 Account. The two lines of debit narrative will be: Line 1 - IEXXXXXXXXXXXXXXXXXX - a unique payment reference applied by AIB. Line 2 - First 18 characters of the 'End to End Id' reference provided by you. The two lines of the debit narrative for the payment charge will be: Line 1 - IEXXXXXXXXXXXXXXXXXX - a unique payment reference applied by AIB Line 2 - PYMT FEE GBP EXX (EXX represents the payment product code.)

Multi-Currency Bulk Payments XML File Format

Product	SCT or Non-SCT	Definition	Debit Posting
All other International Payments	Non-SCT	<ol style="list-style-type: none"> 1. Euro payments debiting an AIB Branch account or AIB currency account going to a recipient bank outside the SEPA zone. 2. Non-euro payments, debiting an AIB Branch or AIB Currency Account going to a recipient bank in Republic of Ireland and worldwide. 	<p>A debit entry for each International Payment is posted individually to the respective debit account.</p> <p>The two lines of debit narrative on the nominated debit account will be: Line 1 - IXXXXXXXXXXXXXXXXX Line 2 - First 16 - 18 characters of the 'End to End Id' reference provided by you.</p> <p>The two lines of the debit narrative for the payment charge will be: Line 1 - IXXXXXXXXXXXXXXXXX - a unique payment reference applied by AIB Line 2 - AIB Payment Fee Oxx (Optional) - 'Oxx' represents the payment product code.</p>
Payments within AIB		<ol style="list-style-type: none"> 1. Euro and non-euro payments debiting an AIB Branch account and crediting an AIB Currency account. 2. Euro and non-euro payments debiting an AIB Currency account and crediting an AIB Branch account or AIB currency account. 	<p>A debit entry for each payment is posted individually to the respective debit account.</p> <p>Debit Reference = Line 1 = IXXXXXXXXXXXXXXXXX Line 2 = *First 16 - 18 characters of the 'End to End Id' reference provided by you.</p> <p>Credit Reference = Line 1 = IXXXXXXXXXXXXXXXXX Line 2 = *First 16 - 18 characters of the 'End to End Id' reference provided by the debtor.</p> <p>*AIB Currency Accounts display 16 characters as the narrative. AIB Branch Accounts display 18 characters as the narrative.</p>

* SEPA Zone = See Appendix 2 – Country Codes for list of countries that are currently SEPA reachable.

Please note that iBB does not aggregate multiple payments to the one recipient into one single payment.

2. General Comments

The XML format of this file is based on an XML standard published by the ISO organisation. **ISO 20022** defines the formats for files used in the financial area. The format of the file to be used to submit Payment Instructions is part of the Payment Initiation (PAIN) suite. For Credit Transfers, the specific format is called **PAIN.001**. The version that AIB has used for these formats is **pain.001.001.03**. The XSD validations attaching to these formats can be downloaded from the ISO20022 web site at http://www.iso20022.org/message_archive.page#PaymentsInitiation3

Payments that have the same requested execution date, debtor account and transaction currency should be grouped together in a block within a payment file. There is a limit of 25 payment blocks per file. AIB will not accept files containing more than 25 payment blocks.

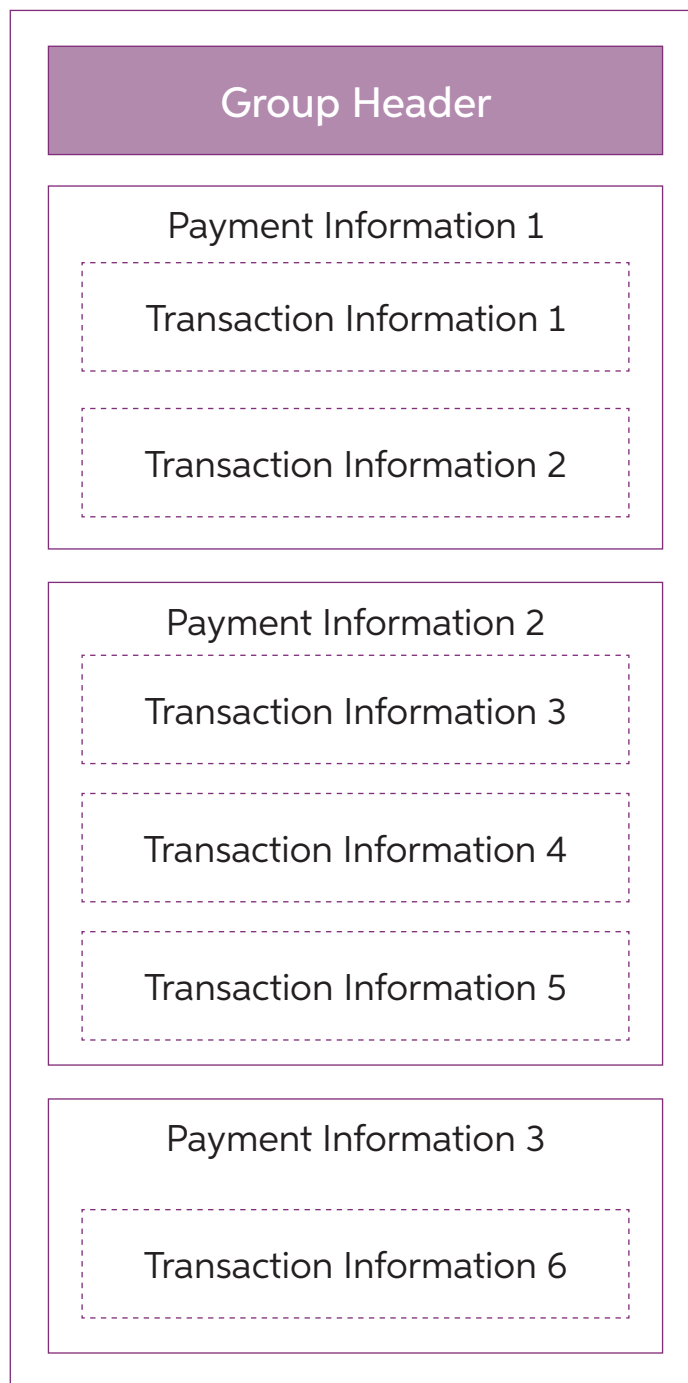

2.1 The XML file structure:

A file must contain a single Document (Envelope), which contains one single XML message.

The message is composed of 3 building blocks:

1. Group Header Block: This building block is mandatory and present once. It's function is to identify the file. It contains elements such as Message Identification, Creation Date and Time, Grouping Indicator.
2. Payment Information Block: This building block is mandatory and repetitive. It represents a logical grouping of your payments. It contains elements relating to the debit side of the transaction, such as the Debtor Account, Requested Execution Date and Currency for the transactions contained in the block.
3. Transaction Information Block: This building block is mandatory and repetitive. It represents the actual payments that you wish to make. It contains, amongst others, elements relating to the credit side of the transaction, such as creditor/recipient account and remittance information.

The diagram below shows how the Document is composed:

The table below shows how these blocks are to be coded within the actual XML file.

Multi-Currency Bulk Payments XML File Format

The XML Node column shows the xml “node name” used to describe the data (e.g. a <Document> node is used to start the file. The file will be ended with a </Document> node. All the xml within these nodes are part of the file.

The “+” signs in the XML Node column indicates the “depth” of the xml sub node e.g. the <CstmrCdtTrfInItN> is a subnode of <Document>, <GrpHdr> is a subnode of <CstmrCdtTrfInItN> etc.

XML Node	Cardinality	Comments
Document	Only one per file	Currently need to define the namespaces: <ul style="list-style-type: none"> xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" xmlns="urn:iso:std:iso:20022:tech:xsd:pain.001.001.03"
+CstmrCdtTrfInItN	Only one per Document	
++ GrpHdr (Group Header)	Only one per CstmrCdtTrfInItN	The Group Header Block
++ PmtInf	One or more per CstmrCdtTrfInItN	A Payment Information Block. This is a logical grouping of Payment Instructions (CdtTrfTxInf blocks below) in a file. All the Payment Instructions within a Payment Information Block must be for: <ul style="list-style-type: none"> The same Debtor Account, The same Requested Execution Date and The same Transaction Currency
+++CdtTrfTxInf	One or more per PmtInf	The Transaction Information Block: The actual Payment Instructions

2.2 The Character Set:

The MCY XML format can support a range of characters, as follows:

1. a b c d e f g h i j k l m n o p q r s t u v w x y z

2. A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

3. 0 1 2 3 4 5 6 7 8 9

4. / - ? : () . , ' +

These characters are also valid characters but they should not be inserted as the first or last character within any field. If invalid characters are included within the file, they may be substituted by a space or the file may be delayed and/or not processed by AIB. Examples of invalid characters include ß Å and &

5. Space

2.3 Multiple Occurrences of Data:

The XML file allows certain information to be specified at either the Payment Information Block level or Transaction Information Block level. For example, the Ultimate Debtor information for any given payment can be specified at Payment Information Block Level or at Transaction Information Block level. If it is populated in both levels, the file will be rejected. The table below will specify the tags that this restriction applies to.

2.4 Recipient/Creditor Account Details

EU legislation states that for **SEPA Credit Transfer (SCT)** payments, the Recipient's IBAN must be used to specify the recipient's account.

For all other payment types, the following information must be provided:

1. SWIFT BIC of the Recipient Bank
2. Recipient's IBAN number

OR

1. SWIFT BIC of the Recipient Bank
2. Recipient Bank Sort Code/Clearing Code
3. Recipient's Account Number

Exceptions:

For **GBP payments that debit a 238590 account and credit a bank connected to UK FPS and/or CHAPS clearing systems** the following recipient details can be used:

SWIFT BIC of the Recipient Bank and IBAN of the Recipient

OR

Recipient Bank National Sort Code and Recipient Account Number

For **USD payments going to the US**, the following recipient details must be used:

- SWIFT BIC of the Recipient Bank
- Recipient Account Number, and;
- 9 digit Recipient Bank Fedwire/ABA Code

OR

Where the recipient bank does not have a SWIFT BIC the following recipient details can be used

- 9 digit Recipient Bank Fedwire/ABA Code,
- Recipient Account Number, and;
- Country Code of the Recipient Bank

Multi-Currency Bulk Payments XML File Format

2.5 Charges Bearer:

This XML tag specifies which party will pay the charges associated with the processing of the payment instructions.

For SCT payments, EU legislation mandates that the respective charges are borne by the sender and the recipient of the payment i.e. SLEV (Service Level). AIB will default the value of SLEV for SCT payments.

Similarly, for most other payment types, where the charges are borne by the sender and the recipient of the payment respectively, the Charges Bearer value is SHAR. AIB will default a value of SHAR for these payment types.

In certain circumstances, for example, when sending payments outside the SEPA zone, you may elect to pay both the sender and recipient charges so that the recipient receives the full amount of the payment. In this case, DEBT must be used in the <ChrgBr> tag. Please see table below for further information on the DEBT charging option.

Charging Option	Impact on you	Comment
SLEV	You pay the AIB charge and the recipient/receiver pays the charges of all other intermediary and/or recipient banks.	Must be applied to all SCT payments.
SHAR	You pay the AIB charge and the recipient/receiver pays the charges of all other intermediary and/or recipient banks.	Used for non-SCT payments SHAR is mandatory for payments to any EU/EEA country. SHAR can be applied for payments to Non EU/EEA countries. Intermediary and/or receiver bank charges may, in some cases, be deducted from the payment amount, before it is credited to the recipient's account.
DEBT	You pay the AIB charge and the charges of all other intermediary and/or recipient banks.	DEBT can only be used for international Payments where the beneficiary bank is outside the EEA - if you select this charging option, your account will be debited with the AIB charges and with all other bank charges when the notification is received from the relevant bank (s). If you wish to use a value of DEBT, it must be populated in the Charges Bearer tag at Transaction Level only (ref pg. 16) to ensure this message travels with the payment. Note: Foreign bank charges may take some time before being sent to AIB and applied to your account. Our recommendation is that, as far as practical, AIB customers should exercise caution when using the 'DEBT' charging option as it may result in substantial charges being passed back to you.

(1) EU/EEA currencies include the following: EUR – euros, GBP – Pound Sterling, CHF – Swiss Franc, CZK – Czech Koruna, DKK- Danish Krone, HUF – Hungarian Forint, NOK – Norwegian Krone, PLN – Polish Zloty, SEK – Swedish Krona, ISK – Icelandic Krona and RON – Romanian Leu. The following EU/EEA currencies are not currently available for sending/receiving international payments: BGN – Bulgarian Lev.

(2) The SEPA zone is a common Euro payments area that includes EU Member States and a number of other countries and jurisdictions. As the list of destinations changes from time to time, an up to date list is available on www.aib.ie under the 'Help & Guidance' section and on the Paylink Euro application form.

Please see table on pages 35 - 41. SEPA destinations are marked with an asterisk.

(3) EEA = EU Member States and Norway, Iceland and Liechtenstein

Please note, Points 1 - 3 may change from time to time.

AIB endeavours to limit the amount of charges applied by intermediary (agent) banks, by routing payments through recognised clearing and settlement systems directly to the recipient's bank (e.g. STEP2 and Target2) or through preferred intermediary banks.

The extent of the intermediary network required to allow us send payments to most countries in the world means that it is practically impossible for us to provide details of other bank's charges prior to our customers making a payment.

3. The MCY PAIN.001 File:

The table below shows ALL the allowable XML tags, how they should be formatted and how they will be validated by AIB.

The format for all tags is Alpha Numeric unless otherwise stated.

The XPATH listed below for each field is the location of the field within the file.

3.1 Document

Each file must begin with

```
<?xml version="1.0" encoding="UTF-8"?>
<Document xmlns="urn:iso:std:iso:20022:tech:xsd:pain.001.001.03"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance">
```

3.2 Group Header

Generic Field Name	XPath	Mandatory/ Optional/ Conditional	Max Length	Format/Comments
GrpHdr Block				
Message Id	Document + CstmrCdtTrflnitn ++ GrpHdr +++ MsgId	M	35	Customer reference. This field can contain your own reference to assist you in identifying the file. If you are submitting your file using SFTP or Connect Direct, the first 18 characters of the value populated in this field will appear as a second line narrative on the debit account statement.
Creation Date/Time	Document + CstmrCdtTrflnitn ++ GrpHdr +++ CreDtTm	M	19	This is the Date/Time that the file is created. YYYY-MM-DDTHH:mm:SS Example: <CreDtTm>2013-01-28T08:35:30</CreDtTm>
Header No of Transactions	Document + CstmrCdtTrflnitn ++ GrpHdr +++ NbOfTx	M	15	This is a numeric field detailing the total number of transactions in the file. [0-9]{1,15}
Header Control Sum	Document + CstmrCdtTrflnitn ++ GrpHdr +++ CtrlSum	M	18	This value should be the total sum of all payments within the file (ignoring their currencies e.g. £123.45 + \$2456.78 + €2300.00 = 4880.23) Decimal place must be included where applicable.

Multi-Currency Bulk Payments XML File Format

Generic Field Name	XPath	Mandatory/Optional/Conditional	Max Length	Format/Comments
Initiating Party Organisation Id	Document + CstmrCdtTrfInitn ++ GrpHdr +++ InitgPty ++++ Id +++++ OrgId ++++++ Othr +++++++ Id	M	35	This is the Originator Identification Number (OIN). It will be validated against the OIN agreed with AIB. Sample OIN = IEXXMCYZZZZZZ where XX is a check digit and ZZZZZZ is a 6 digit identification number.

3.3 Payment Information Block

Generic Field Name	XPath	Mandatory/Optional/Conditional	Max Length	Format/Comments
PmtInf Block				
Payment Information Id	Document + CstmrCdtTrfInitn ++ PmtInf +++ PmtInfId	M	35	An identification assigned by you to identify the Payment Information Block within the file e.g. USD Supplier Payments. We recommend that you use a unique identification reference for each Payment Information Block within the file. This information will also be quoted back to you in a PAIN.002 file in the event of payment rejects.
Payment Method	Document + CstmrCdtTrfInitn ++ PmtInf +++ PmtMtd	M	3	This field must contain the three letters "TRF".
Batch Booking	Document + CstmrCdtTrfInitn ++ PmtInf +++ BtchBookg	O	5	Value can be true or false. Please note AIB will batch all SCT payments within each Payment Information Block, thereby resulting in one debit.
Block Number of Transactions	Document + CstmrCdtTrfInitn ++ PmtInf +++ NbOfTxs	M	15	This is a numeric field detailing the total number of transactions in the Payment Information Block. [0-9]{1,15}
Block Control Sum	Document + CstmrCdtTrfInitn ++ PmtInf +++ CtrlSum	M	18	This value should be the total sum of all payments within the Payment Information Block. Decimal place must be included where applicable.

The following six fields relate to Payment Type Information <PmtTpInf> and can appear either in the Payment Information Block or Transaction Information Block **but not both**.

If used, the European Payments Council (EPC) recommends that they are included at **Payment Information Block** level and not at **Transaction Information Block** level.

Generic Field Name	XPath	Mandatory/ Optional/ Conditional	Max Length	Format/Comments
Instruction Priority	Document + CstmrCdtTrfInitn ++ PmtInf +++ PmtTpInf ++++ InstrPrty	O	4	Value can be HIGH or NORM. Please note AIB will treat payments received in a bulk payments file as normal priority (NORM).
Scheme Identification Code	Document + CstmrCdtTrfInitn ++ PmtInf +++ PmtTpInf ++++ SvcLvl +++++ Cd	O	4	If you wish to use this tag, specify a value of SEPA . AIB will route the payment via SEPA if appropriate.
Local Instrument Code	Document + CstmrCdtTrfInitn ++ PmtInf +++ PmtTpInf ++++ LclInstrm +++++ Cd	O	35	Applicable to all Payments (excluding payments from 238590 account) The code entered here must be chosen from a defined list of ISO codes. Please refer to the most recent ISO documentation for further information; http://www.iso20022.org/external_code_list.page See note in Local Instrument Proprietary field below.
Local Instrument Proprietary	Document + CstmrCdtTrfInitn ++ PmtInf +++ PmtTpInf ++++ LclInstrm +++++ Prtry	O	35	Applicable to all Payments (excluding payments from 238590 account) This tag can only be used if the Local Instrument Code above is not used otherwise the file will fail.
Category Purpose Code	Document + CstmrCdtTrfInitn ++ PmtInf +++ PmtTpInf ++++ CtgyPurp +++++ Cd	O	4	For all payments (excluding payments from 238590 account) this tag specifies the purpose of the payment. The code entered here must be chosen from a defined list of ISO codes. Please refer to the most recent ISO documentation for further information; http://www.iso20022.org/external_code_list.page
Category Purpose Proprietary	Document + CstmrCdtTrfInitn ++ PmtInf +++ PmtTpInf ++++ CtgyPurp +++++ Prtry	O	35	This tag can only be used if the Category Purpose Code above is not used. This must not be used for payments from 238590 accounts..

Multi-Currency Bulk Payments XML File Format

Generic Field Name	XPath	Mandatory/Optional/Conditional	Max Length	Format/Comments
Requested Execution Date	Document + CstmrCdtTrfInitn ++ PmtInf +++ ReqdExctnDt	M	10	YYYY-MM-DD AIB will accept files with requested execution dates up to 30 calendar days into the future. The value entered on the FIRST Payment Information Block should be the earliest debit date in the file. The information contained in this tag will be used as part of the file duplication check. AIB will identify files as being potential duplicates if they have the same OIN number, Header Control Sum and Requested Execution Date.
Debtor Name	Document + CstmrCdtTrfInitn ++ PmtInf +++ Dbtr ++++ Nm	M	70	This tag should contain the name of the account owning entity making the payment. The name populated in this field will travel with the payment to the recipient bank.
Debtor Postal Address Country	Document + CstmrCdtTrfInitn ++ PmtInf +++ Dbtr ++++ PstlAdr +++++ Ctry	O	2	AIB will substitute this value with the country code of your account.
Debtor Postal Address Line 1	Document + CstmrCdtTrfInitn ++ PmtInf +++ Dbtr ++++ PstlAdr +++++ AdrLine[1]	M	70	AIB will substitute this value with the first line of the debit account address.
Debtor Postal Address Line 2	Document + CstmrCdtTrfInitn ++ PmtInf +++ Dbtr ++++ PstlAdr +++++ AdrLine[2]	M	70	AIB will substitute this value with the second line of the debit account address.

The xml at this point may include additional information regarding your **Organisation** or **Private Identification**. This information is optional and is not required for processing of the payments. Its purpose is to identify you to the recipient (provided you have agreed with them that that is how you should be identified). It only applies to payments transmitted through the SEPA scheme.

See Section 4 – Debtor Organisation or Private Identification).

Generic Field Name	XPath	Mandatory/ Optional/ Conditional	Max Length	Format/Comments
Debtor Account	Document + CstmrCdtTrflnitn ++ PmtInf +++ DbtrAcct ++++ Id +++++ IBAN	M	34	[A-Z]{2,2}[0-9]{2,2}[a-zA-Z0-9]{1,30} Must be in IBAN format. This is the account number from which the payments in this block will be debited.
Debtor Account Currency	Document + CstmrCdtTrflnitn ++ PmtInf +++ DbtrAcct ++++ Ccy	M	3	ISO Currency Code. This is the currency of the account that will be debited.

It is mandatory to populate one of the following two fields. The 'Debtor Agent BIC' is optional for SCT Payments.
If you choose not to populate the 'Debtor Agent BIC' field for a SCT Payment then the 'Debtor Agent ID' field must be populated with a value of 'NOTPROVIDED'.

Debtor Agent BIC	Document +CstmrCdtTrflnitn ++PmtInf +++DbtrAgt ++++FinInstnId +++++BIC	C	11	[A-Z]{6,6}[A-Z2-9][A-NP-Z0-9]{0,1}([A-Z0-9]{3,3}) Mandatory for non SCT Payments For payments debiting AIB Branch Accounts (EUR) or 930067 Currency Accounts, the value in this tag must be AIBKIE2D or AIBKIE2DXXX . For payments debiting 238590 accounts, the value in this tag must be AIBKGB41UND .
Debtor Agent ID	Document +CstmrCdtTrflnitn ++PmtInf +++DbtrAgt ++++FinInstnId +++++Othr +++++Id	C	11	The field must contain NOTPROVIDED Must not be used for non SCT Payments

The xml at this point may include additional information regarding the Ultimate Debtor. This information is optional and is not required for processing of the payments. Its purpose is to identify a third party on whose behalf you are making payments.

It only applies to payments transmitted through the SEPA scheme.

See Section 5 –Ultimate Debtor Organisation or Private Identification

If you wish to use this information, you can specify it here in the Payment Information Block, or in the Transaction Information Block, **but not both**.

Multi-Currency Bulk Payments XML File Format

Generic Field Name	XPath	Mandatory/ Optional/ Conditional	Max Length	Format/Comments
Charge Bearer	Document + CstmrCdtTrfInitn ++ PmtInf +++ ChrgBr	O	4	<p>DEBT or SHAR or SLEV.</p> <p>See notes on Charge Bearer in General Comment Section for further information.</p> <p>This information can appear either in the Payment Information Block (PmtInf) or Transaction Information (CdtTrfTxInf) Block but not both.</p> <p>If you wish to use a value of DEBT, it must be populated in the Charges Bearer tag at Transaction Level only (ref pg. 16) to ensure this message travels with the payment.</p>

Terms and conditions apply.

Allied Irish Banks, p.l.c. is regulated by the Central Bank of Ireland.

Appendix 4 – Sample MCY XML File

This is a sample MCY XML file created by ABC Limited (Originator Identification Number = IE58MCY000055).

It contains three Payment Information Blocks as follows:

Block 1 contains 2 SCT payments - one to a beneficiary in Ireland and one to a beneficiary in Germany

Block 2 contains a GBP payment to a beneficiary in the UK

Block 3 contains a USD payment to a beneficiary in the US

A brief summary of the payments is detailed in the table below:

```

Appendix 5 – Revision History

Date	Section	Page	Update Description
Mar-13	Section 3	Page 10	“The XPATH listed below for each field is the location of the field within the file.”
Mar-13	Initiating Party Organisation Id	Page 11	Sample OIN = IEXXMCYZZZZZZ where XX is a check digit and ZZZZZZ is a 6 digit identification number.
Mar-13	Payment Information ID	Page 11	“We recommend that you use a unique identification reference for each Payment Information Block within the file”
Mar-13	Debtor Postal Address Line 1 and Debtor Postal Address Line 2	Page 13	Debtor Postal Address Line 1 and Debtor Postal Address Line 2 on page 13 M (Mandatory)
Mar-13	Instruction Id (Section 3.4)	Page 14	“Please note that this field cannot contain leading, trailing or internal spaces”
Mar-13	Instructed Amount (includes the Payment Currency)	Page 15	“The maximum amount is 999999999.99”
Mar-13	Remittance Data Issuer Remittance Data Reference	Page 18	1. Now a conditional field “C” 2 “This field becomes mandatory if SCOR is used in remittance data proprietary code field.”
Mar-13	Appendix 4	Page 40	Appendix 4 added.
Jul-13	Section 2. General Comments	Page 5	Payments that have the same requested execution date, debtor account and transaction currency should be grouped together in a block within a payment file. There is a limit of 25 payment blocks per file. AIB will not accept files containing more than 25 payment blocks.
Jul-13	Add Appendix 5 – Revision History	Page 45	Revision History Added.
Aug-13	Appendix 1	Page 31	Spelling of Lithuanian corrected.
Aug-13	Appendix 2 – Country Codes		Columns 3, 4, 5 and 6 removed.
Jan-14	Section 1.1 Payment Types	Page 4	“The two lines of debit narrative on the nominated debit account will be: Line 1 - PFXXXXXXXXXXXXXXXXXX where PF stands for Payment File and XXXXXXXXXXXXXXXXXXXX is the unique file reference generated by AIB when the file is uploaded. Line 2 - First 18 characters of the reference populated by you in the Customer Reference field at the time of file upload.”
Jan-14	Message Id	Page 10	If you are submitting your file using SFTP or Connect Direct, the first 18 characters of the value populated in this field will appear as a second line narrative on the debit account statement.

Date	Section	Page	Update Description
